

HUSKY-E

Heavy Duty Electric Cargo Bike

Laplandar

The Safest Cargo Bike On The Market

Laplanders' Husky-E is an electric cargo bike developed for businesses to replace the use of vans in urban environments.

Potholes, bumps, and uneven slopes on the road, are absorbed by the tilting joint between the front and the cargo bay. Allowing the driver to maintain full control.

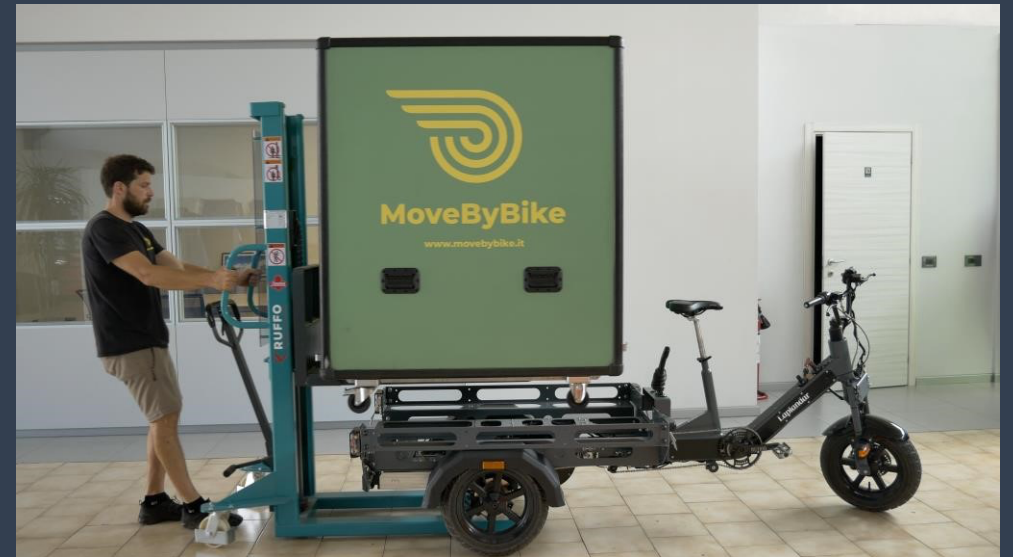

The tilting joint also gives the feel of maneuvering a two-wheeled bike. Operating the bike feels natural and becomes instinctive after a few hours.

Loadable cargo bed and modular cargo box

Laplandar bikes are developed to be loaded by pallet stacker or forklift and can be equipped with Laplandars' modular box system. The boxes are reinforced for the prongs of pallet stackers that also may fit in the chutes in the cargo bed.

As a bike returns to the distribution center with an empty cargo box it is quickly and easily exchanged for a full one and the bike can go back to the streets.

The cargo boxes can be delivered fully customized. (* Patent Pendin)

Laplandar

A professional cargo bike with durability and raw power.

Laplandar gives a safe and secure driving experience beyond the usual.

Scooter wheels equipped with all season tyres give a solid grip and the hydraulic disc brakes have more than 5 times the brake lining of average bike brakes.

With a number of parts sourced directly from the automotive industry, you will get a cargo bike with the durability and reliability necessary for daily business use.

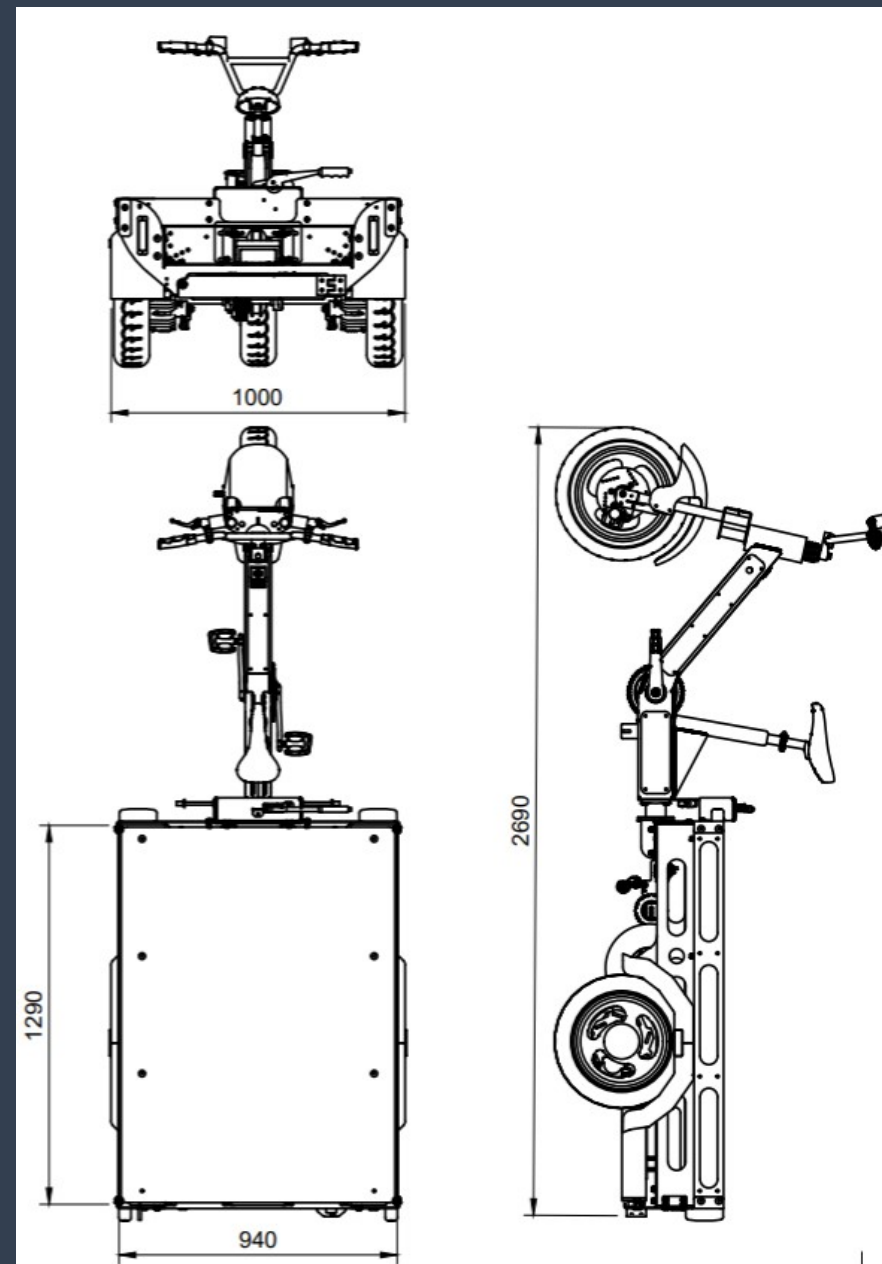

Service intervals range from quarterly to biannually depending on use and you can expect a minimum of 1 years use of any use parts such as brakes or tires.

Tekniske specifikationer:

Frame:	Steel frame with tilting joint
Rims:	12" scooter Rims
Tires:	All Season 120/70 -12, Tubeless
Brakes:	3 x 180 mm Hydraulic disc brakes
Motor:	250W nominal output
Battery:	2 x 48V 10Ah LIFEpo4
Gearing:	Shimano Nexus 3 gear
Chainbelt:	Bike chain for gears motorcycle chain for motor
Load capacity:	250 kg
Cargobay dim.:	L: 129 cm, B: 94 cm
Total Length:	269 cm
Range:	Up to 15 km per battery
Weight:	155 kg
Coating:	Zinc primer and powder coated
Equipment:	Headlight, rearlights, reflectors, warning bell, Front and rear indicators, sidemirrors

Price:

Cargo Box Specifications

Material :	Dual layer PP composite with honeycomb core
Dimensions :	H: 100, B: 915, L: 1230 mm
Weight:	40 kg
Capacity :	200 kg

Add ons:	Logo print
	Partial or full foil wrap
	Bespoke lock solutions
	Tracking unit within chassis

Price:

Can be delivered in bespoke measurements and configurations. Contact Us directly for further information.
